- ...

Research related tasks

- Publication/Patent
- Conference lecture
- Poster presentation at a conference (English)
- Supervision of a master thesis

Doctorate at UMSICHT

The UMSICHT Research School at a glance

Doctoral students represent a decisively important pillar of the scientific approach within the Fraunhofer-Gesellschaft. Fraunhofer UMSICHT offers you an inspiring space to realize your scientific ideas.

- The UMSICHT Research School accompanies and advises you to achieve your doctorate within a period of three to four years.
- You will complete your doctorate in the allotted time and still be involved in exciting projects in your department.
- A qualification agreement creates clarity about the distribution of tasks between you and the person supervising you.

- The coordinator of the UMSICHT Research School accompanies the entire process through regular confidential status meetings.
- In cooperation with the coordinator, you will develop an individual training plan with customized support and qualification measures for you.
- External coaching offers additional targeted support once a month for the dissertation writing project and for the creation and optimization of scientific texts.
- You are currently working with about 70 other doctoral students on application-related research questions.
- Joint visits to industry partners give you the opportunity to get to know potential employers at an early stage.

The supervision by the Research School I have found to be very positive. Through the regular discussions with coordinator Volker Knappertsbusch, which dealt with the current status of the work, the overall goal – namely the completion of the PhD project – always in view.”

Dr.-Ing. Lukas Wilhelm

Former PhD student in the Electrochemical Energy Storage department at Fraunhofer UMSICHT.
